PROFILE

Results-oriented software developer with 4 years of experience in iOS development.
Focused on creating modular, testable and easily maintainable code. Highly adaptable to quickly changing technical environments.
Always striving to improve and learn from others, and willing to share my knowledge and teach others.

WORK EXPERIENCE

Software Engineer
LotusFlare | Belgrade, Serbia | September 2019 - Present
Worked on a customer care app called Tapp, for telecommunication operator Digi, in Malaysia.
The app utilizes CleanSwift architecture.
I've also helped in developing internal modules which are used by this app, and other internal apps. These modules are:
- Camera controller.
- Form library.
- Networking and storage module, ui toolkit, and various utilities.

Software Engineer
Symphony | Belgrade, Serbia | January 2018 - September 2019
Worked on many different project for various clients.
Some of the projects that I've worked on are:
- React Native app which uses Bluetooth to communicate with custom made hardware.
- iOS app which uses wireless radio frequency signals to detect motion inside home environment.

Software Engineer
Ametek | Mount Prospect, IL, USA | June 2016 - October 2017
Developed apps which were used by both caregivers and patients inside healthcare facilities.
- Caregiver app to respond to patient app requests.
- Patient app which communicated with the caregiver app using REST endpoints, as well as through SIP (only audio).
- Designed and in-house SharePoint intranet website.
